INTRODUCTION

After studying Spatial Design for three years at l'Ecole de Design Nantes Atlantique in Nantes, France, I decided to finish my Master's degree in a Transcultural program, focusing on Human-Centered design in New Delhi, India.

In 2016, I graduated as an interior designer, complemented with a special jury prize for my final project showcase achievements.

My passion for human experiences have, and still are guiding me towards sustainable innovations in architecture. This influenced my design process during my diploma project «Newater Delhi», which was awarded the «Label 2018 Observateur du design» prize by the APCI, and published in newspapers as Canal+, CNN Style or Designboom. The project was exhibited during the Dubai Design Week at the Global Grad Show 2017.

I have been working as a Design Manager at A_a&d, an architecture agency focusing on its environmental impact, in Shanghai, China for 2 years and a half.

Since August 2018, I am part of the french firm Architecture Studio. I have first integrated the team in Shanghai for a year, before joining the office located in Paris last October 2019.

Label 2018 Observateur du design, Prize. APCI
